

JUSTICE FOR JODIE APPEAL

Imagine taking your healthy toddler for the MMR to see her suffer fits and never recover. Jodie is now 25 and is **80% DISABLED**; her brain damage means that she is non verbal and her epilepsy means daily fits. Years later medical records revealed that actually **8 VACCINES WERE GIVEN, 5 WITHOUT CONSENT OR KNOWLEDGE**. The complexity, legal aid issues and the mix up with the Vaccine damage payment unit means that the family **have never been compensated**.

Mum Pat and dad Bill need support. They care for Jodie 24/7, still changing nappies, but they need a care plan for the future. Bill is 77 years old. I have visited them in their home and will never forget them.

This is a heartbreaking case that affects us all. We need to be able to trust the medical profession and the vaccine damage unit and this means being able to bring them to account. I implore you to give generously, setting up a monthly payment if you can [PayPal.me/arnicauk](https://www.paypal.com/arnicauk) Ref: **JODIE**

We have found a brilliant Barrister willing to work for a greater reduced retainer but we still need to raise around £10,000 over the next 6 months All money raised will go towards the Legal appeal for Jodie Marchant who is severely vaccine injured. Please contact me for further information
